SoterCare.

"We help care facilities for elders provide better care and attention to their residents, and peace of mind to guardians, with a wearable-powered smart care platform."

THE STORY

Meet Passan and his parents

Passan has a job offer in Australia. His father, Mr. Fonseka, is 75 and lives with dementia, and his mother can no longer care for him alone.

HIS TWO OPTIONS

- A carer at home
- A professional care home

WHAT MATTERS TO PASSAN

Quality of care

A home built for his needs

Attentive carers

Someone notices when he needs help

Fast response

Help in minutes, not at the next round

Updates from anywhere

Honest updates from Australia

MACROTRENDS

Ageing faster than care can keep up

SoterCare.

WORLDWIDE

1.4 billion

people aged 60+ by 2030

That is **1 in 6** people on Earth

CARE WORKER SHORTAGE

13.5 million

more care workers needed by 2040

Across OECD countries

Sources: WHO, Ageing and health fact sheet (1.4 billion people aged 60+ by 2030, 1 in 6); OECD, Who Cares? 2020 (13.5M more long-term care workers needed by 2040; 22.5M and 36M derived from its 60% rise on 2016).

THE PROBLEM

Care breaks down, unseen

SoterCare.

WHAT HAPPENS

Help comes late

31% of fallers waited over an hour on the floor

More hospital trips

1 in 4 falls led to an emergency visit

Families left guessing

Promises, not proof, about what happened

THE CORE PROBLEM

81%

of care home falls are unwitnessed

83% happen in the resident's own room, where no one is watching.

WHY IT HAPPENS

Understaffed

2 to 3 carers cover every room at night

Outdated monitoring

Unwatched CCTV, two-hourly rounds, call bells

Poor records

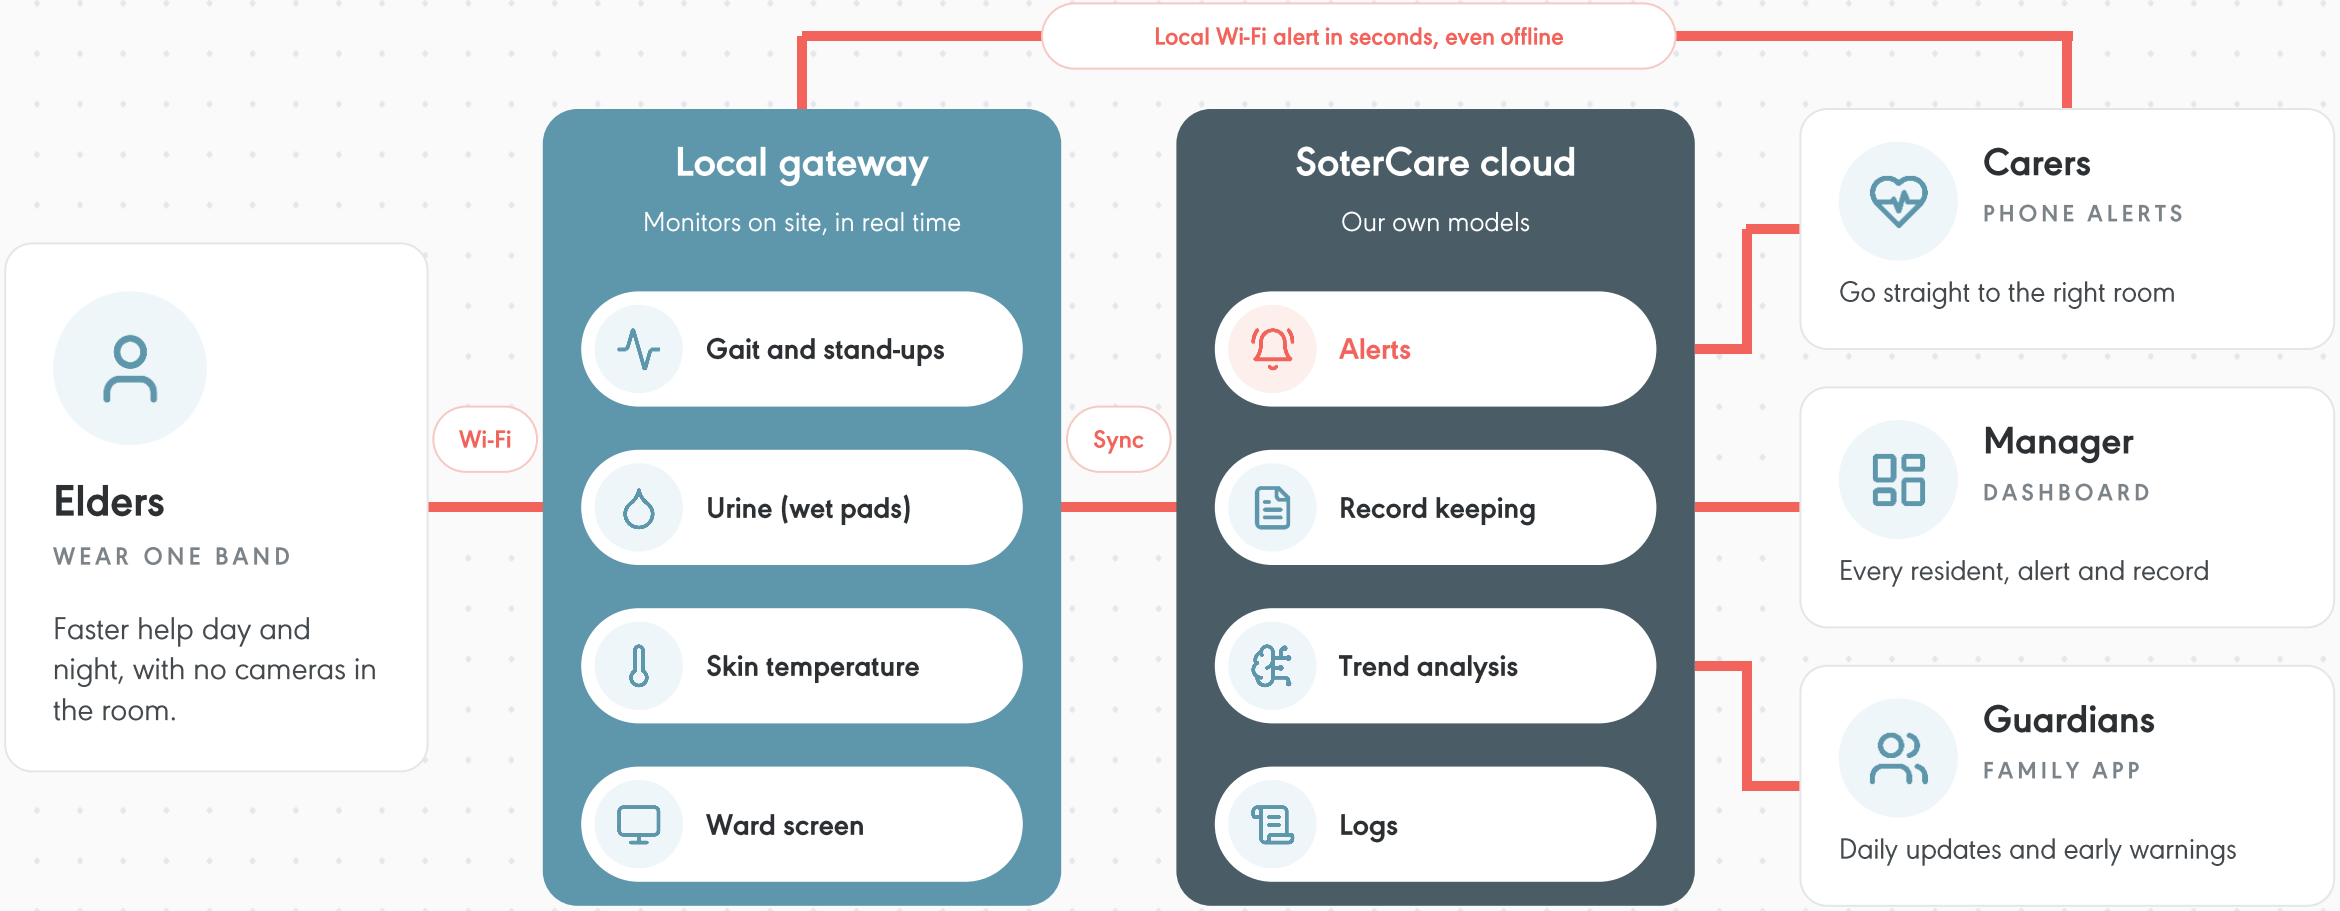

Handover runs on memory

Sources: unwitnessed falls and own room, JAMDA 2025 (212 falls, single US facility); time on floor, JMIR 2021 (6 memory care facilities); emergency visits, AJMC 2019 (SafelyYou pilot, control group); staffing, Kodagoda Gamage et al., BMC Geriatrics 2024.

THE SOLUTION

Connecting all, one ecosystem

SoterCare.

PRODUCT AND MOAT

Our product is our moat

Thigh node

Senses gait, moisture and skin temperature; streams to the gateway over Wi-Fi

Wi-Fi

Ward gateway

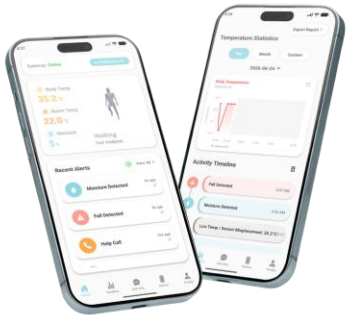

Runs the gait model; alerts carers' phones over local Wi-Fi, even offline

Sync

SoterCare AI

Intelligence layer: learns each resident's patterns; keeps records and reports

Push

Apps

Carer app, family app and manager dashboard

97.65%

gait classification accuracy (lab data)

WHY HOMES STAY

- Gateway installed
- Residents used to the band
- Staff trained on the app
- Families rely on updates

WHY NOW

Three global shifts opened the window

SoterCare.

Sensors got cheap

A 6-axis motion sensor now costs about $1.40. A clinical gait unit cost about $2,400.

Our thigh band costs $19 to build

Rules demand proof

Japan pays care homes that use monitoring sensors. Australia now enforces minimum care minutes.

Every alert and response is logged

Privacy beats CCTV

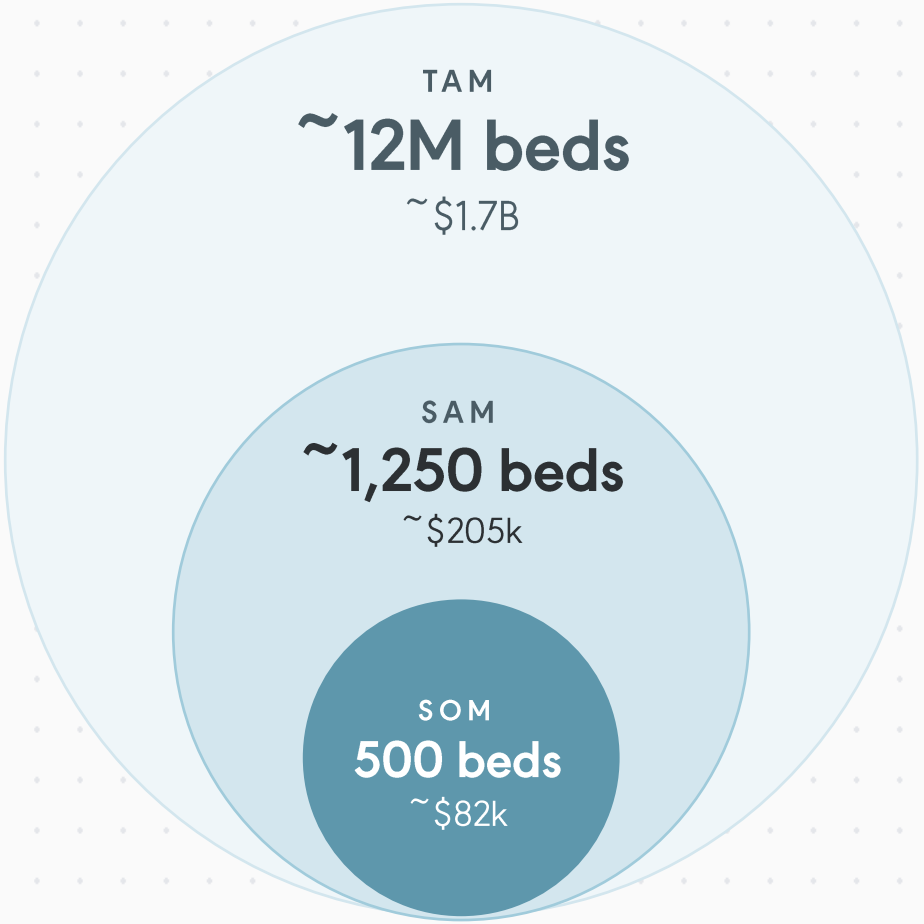

UK regulators expect less intrusive options before cameras go into bedrooms.

No cameras in the room

Sources: APDM Opal list price (via Fibion); STMicroelectronics IMU distributor prices, 2026; Japan MHLW 2024 care fee revision (Productivity Improvement Promotion addition); Australia Aged Care Act 2024, in force 1 Nov 2025; CQC, Using surveillance in your care service.

MARKET POTENTIAL

Prove it in Sri Lanka, sell it to the world

TAM — **Global**

Care beds paying $400+ a month: OECD, China, Taiwan and Hong Kong

SAM — **Sri Lanka**

Fee-paying care homes, about 50 homes with 25 beds each

SOM — **First 12 months**

500 beds in 20 homes after launch

NEXT MARKET · AUSTRALIA, YEARS 3 TO 5

228,000 beds, ~$31M first-year value. Care-minute laws and staff shortages push homes to tech.

FIRST TARGET

Private homes with 10+ beds in Western Province charging $330 to $500 a month

First-year value = beds × $7 × 12 + $40 a bed + $1,000 a home (working in appendix A1). TAM: OECD Health at a Glance 2025 + China (team estimate) + Taiwan MOHW + Hong Kong SWD. Australia: GEN Aged Care Data, 30 June 2025. SAM and goal: team estimates.

COMPETITION AND ALTERNATIVES

Nobody else offers the full set

	SoterCare	Bed-exit sensors (Alert-iT, DAZA)	TENA SmartCare Change Indicator	Camera AI (Kepler Night Nurse)	Radar (Vayyar Care)
Alerts on unassisted stand-up attempts	✓	✓	✗	✓	◐
Detects a wet pad	✓	✗	✓	✗	✗
Records gait and activity continuously	✓	✗	◐	◐	◐
ML trends over weeks, per resident	✓	✗	✗	◐	◐
No cameras in the bedroom	✓	✓	✓	✗	✓
Keeps alerting without internet	✓	✓	◐	✓	◐
Typical price	**$40 a bed, $1,000 gateway, $7 a month**	~$200 to $800 per bed	Sensor plus strips every 12 weeks	Ceiling camera per room, enterprise	~$240 per device + monthly fee

◐ Partly

Moat: SoterCare is the only single system that does all six.

Sources: Abilia Alert-iT; eastin.eu (bed-exit alarm RRP); DAZA OptiSCAN; TENA SmartCare (tena.co.uk); Kepler Vision / MOBOTIX NurseAssist; Vayyar Care reviews, 2026.

BUSINESS MODEL

Healthy hardware margins, then a fee per bed

SoterCare.

THIGH NODE

$40

one per resident

Our cost	$19
Gross margin	52% ($21)

WARD GATEWAY

$1,000

one per home, 15.6-inch screen

Our cost	$500
Gross margin	50% ($500)

SUBSCRIPTION

$7

per bed per month

Cost to serve	~$2
Gross margin	~70% ($5)

FOR A 25-BED HOME

$2,000

once, for 25 bands and a gateway

$175

a month, subscription

~3%

of a $300 monthly room fee, hardware over 3 years

BENEFITS FOR CARE HOMES

What the care home gets back

LOWER NURSING COST

3x

cheaper than adding one more 24/7 carer post, for a 25-bed home in Sri Lanka

~$230	a month for SoterCare, hardware spread over 3 years
~$720	a month for one 24/7 post: about 4 carers

In Australia and the US: 9x

Low, fixed price

$7 a bed a month, about 3% of the room fee

Carers cover more

Alerts send carers to the right room, with no blind rounds

Fewer emergencies

Help in seconds means fewer hospital trips and less liability

One system for all

Alerts, records, shift reports and dashboards in one place

No extra paperwork

Every alert and response time logged, ready for inspection

Families stay

Daily updates build trust and support premium fees

25-bed home: $2,000 hardware over 36 months + $175 a month = ~$230. A 24/7 post needs about 4 carers at ~LKR 54,000 a month each (Paylab Sri Lanka, carer, midpoint of 80% range; fewer than 20 respondents) at LKR 300 per US$. US: one care worker earns $39,500 a year (BLS, May 2024) vs $4,100 for a first year of SoterCare. Falls: AJMC 2019.

APPENDIX · A1

SoterCare.

Market sizing: the working

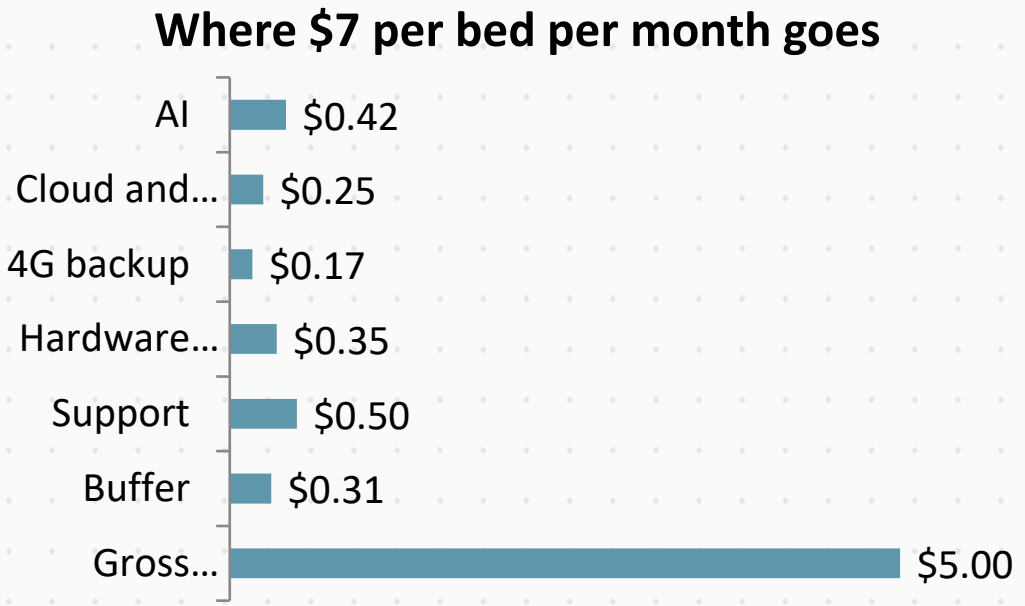

Market and segment	Beds	Subscription / year	Hardware, once	First-year value
SAM: Sri Lanka fee-paying care homes (~50 × 25 beds)	**~1,250**	**$105k**	**$100k**	**~$205k**
Goal: 20 care homes (~25 beds each), 12 months after launch	**~500**	**$42k**	**$40k**	**~$82k**
Next market: Australia residential aged care (GEN, June 2025)	~228,000	$19M	$12M	~$31M
TAM: global care beds paying ~$400+ a month	**~12M**	**$1.0B**	**$670M**	**~$1.7B**
of which OECD countries (OECD Health at a Glance 2025)	~10.3M	$865M	$578M	~$1.4B
of which China, beds paying 2,900+ yuan a month (estimate)	~1.3M	$109M	$73M	~$182M
of which Taiwan (~110,000) and Hong Kong (~76,000)	~0.19M	$16M	$10M	~$26M

First-year value = beds × $7 × 12 + $40 a bed + $1,000 a home. TAM = OECD (252M people aged 65+ × ~41 long-term care beds per 1,000) + China care beds paying 2,900+ yuan ($400+) a month (team estimate: ~25% of 5.2M institutional beds) + Taiwan (MOHW) + Hong Kong (SWD). In Sri Lanka, premium homes clear $400 (Royal Nursing Home's Mount Lavinia rooms start at about $560), while a typical fee-paying home charges about $300. Hardware = $40 per bed + one $1,000 gateway per home, assuming ~62 beds per home in TAM markets, ~88 in Australia (228,259 places in 2,590 homes) and ~25 in Sri Lanka. Priced at our $7 launch fee, so conservative. Totals rounded.

APPENDIX · A2

Hardware pricing, margins and cost to serve

Item	Our cost	Price	Margin
Thigh node	$19	$40	52%
Ward gateway, 15.6-inch touch	$500	$1,000	50%
25-bed home kit	$975	$2,000	51%
Per bed, 25-bed home	**$39**	**$80**	**51%**
Per bed, 60-bed home	**$27**	**$57**	**52%**

Gateway cost: Compute Module 5 $100, 15.6-inch touch panel $125, carrier board with 8 USB-C charging ports $45, LTE $22, battery backup $28, enclosure and stand $48, power supply $15, speaker and cables $17, assembly and test $25 = $425, +3% yield and +15% freight and duty = ~$500. Node landed at 1,000 units. Excludes one-time tooling ($5k to $12k). Estimates, to be replaced with supplier quotes.

APPENDIX · A3

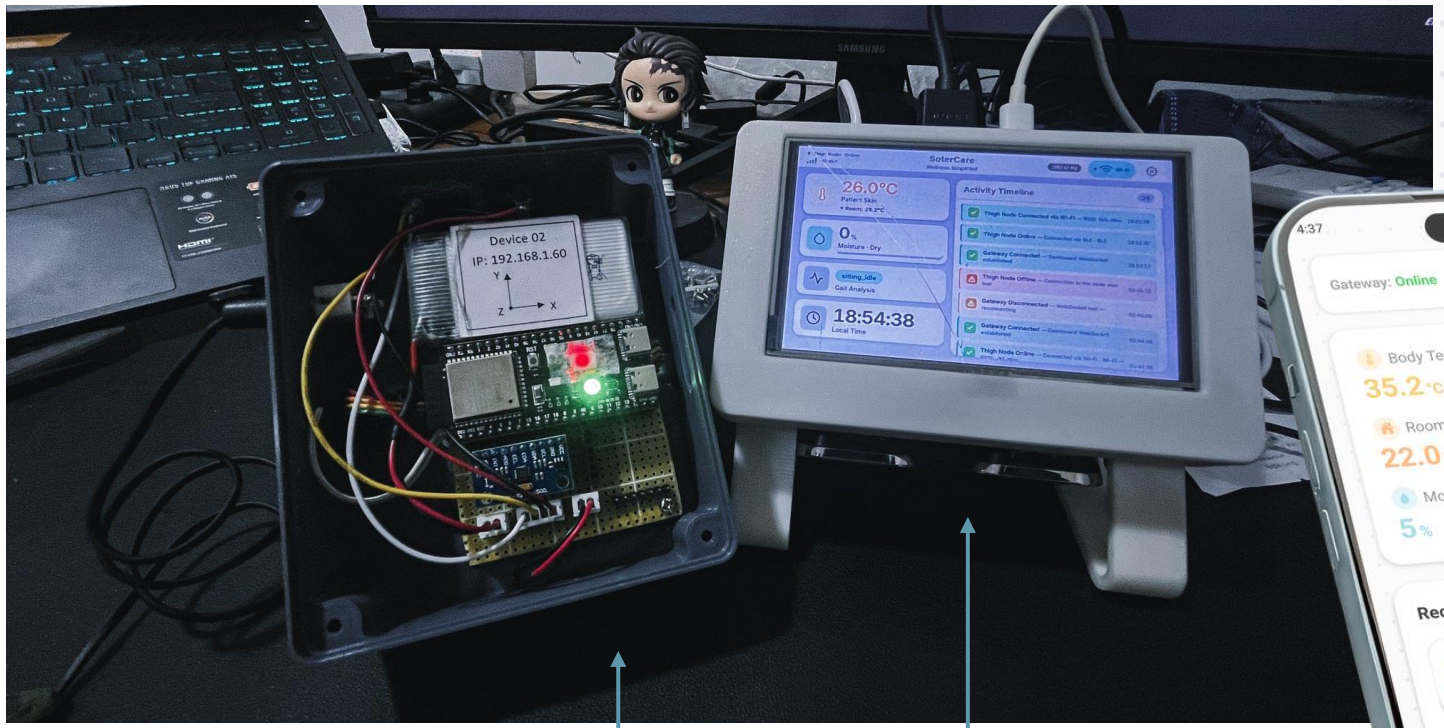

SoterCare.

Known risks, and how we handle them

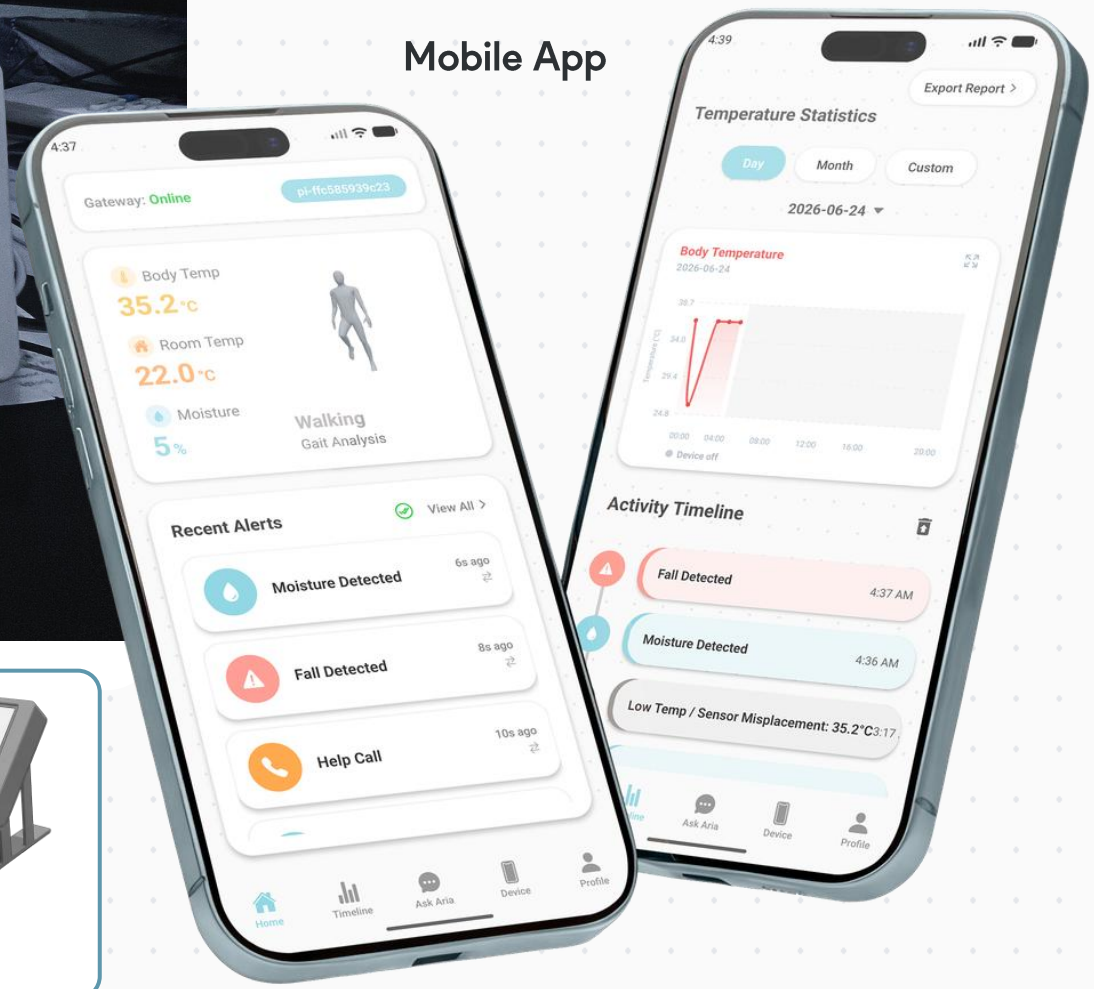

Risk	Mitigation
Residents remove or refuse the wearable, especially with dementia	Soft thigh strap under clothing; measure wear time per resident; target 80%
Charging becomes a burden on scarce staff	7-day battery target; 8 USB-C charging ports on the gateway; low-battery alerts
False stand-up alerts cause alarm fatigue	Report false alarms per bed a week, not lab accuracy; carer confirm or dismiss retrains the model
Lab gait accuracy does not transfer to real homes	Testing phase logs every stand-up attempt against every alert
Home Wi-Fi is unreliable	Gateway alerts carers' phones over local Wi-Fi, no internet needed; it buffers data; site survey before install
Medical device rules (NMRA in Sri Lanka, TGA in Australia)	Position as safety monitoring and records, not diagnosis; comparable fall alarms are TGA Class 1; engage regulators early
Homes with low budgets can't pay upfront	Start with fee-paying homes; hardware-as-a-service option; CSR sponsors for charity homes

APPENDIX · A4

Current working prototype

Mobile App

Smart Thigh Node (Prototype)

ESP32-S3 · IMU · IR temp · moisture clip · haptic feedback · SOS

The Ward Gateway

APPENDIX · A6

Why Australia is our next market

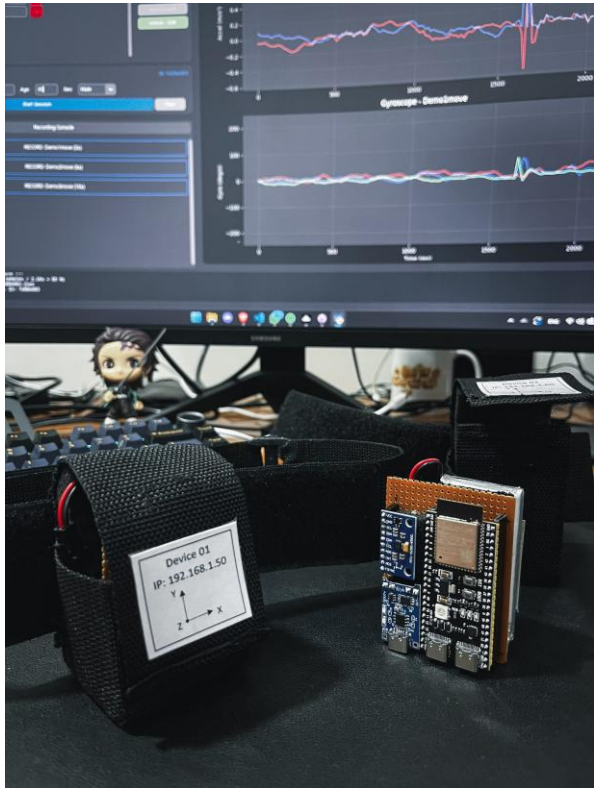

Factor	Australia: next	United States: later
Beds	~228,000 residential beds in 2,590 homes (June 2025)	~2.9M beds in 46,900 homes (2022)
Buyers	707 providers; the top 25 hold ~45% of beds, so a few deals reach scale	46,900 homes across 50 states: many more deals for the same share
Demand	By law: 215 care minutes per resident a day and a registered nurse on site 24/7, while staff are short	Staff shortages; one fall hospital stay costs ~$30,000
Device rules	TGA: comparable bed and chair fall alarms are Class 1 medical devices, listed through a local sponsor	FDA: comparable wearable fall alarms are Class I, exempt from 510(k)
Other rules	RCM mark for radio and electrical safety; Privacy Act 1988 for health data	FCC for radio; HIPAA for health data; state rules
Competition	Fall mats and nurse-call add-ons are common (e.g. Indigo Care)	Well-funded AI players already selling (e.g. SafelyYou)
Value at $7 a bed	$19M a year + $12M hardware	$244M a year + $163M hardware
Verdict	**First export market**	**Next, once certified and proven in Australia**

Sources: GEN Aged Care Data, stocktake 30 June 2025; KPMG Aged Care Market Analysis 2025 (top 25 providers); Aged Care Quality and Safety Commission and ANMF (care minutes, 24/7 registered nurse); TGA ARTG 288028 (bed/chair fall alarm, Class 1); FDA 21 CFR 880.2400, product codes PJO and PJP; CDC NCHS 2022; CDC (fall hospital stay cost). Values at our $7 launch fee, $40 a bed and $1,000 a home.

SUPPORTING SLIDES - INNOVATION

Proactive Gait Analysis Model

A custom classifier on the gateway that recognises stand-up attempts in real time, paired with a private haptic warning.

SoterCare Studio - custom data-capture tool (50 Hz IMU)

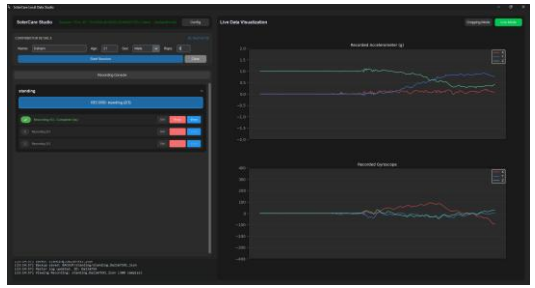

97.65%

testing accuracy

Keras NN + K-means anomaly detection, deployed as an AARCH64 library on the gateway (Raspberry Pi 5)

Five movement states classified in real time

- Walking
- Standing idle
- Sitting idle
- Standing up
- Sitting down

SUPPORTING SLIDES - INNOVATION

A Multi-Agent AI Brain

SoterCare.

Retrieval-Augmented Generation - three asynchronous pipelines that reason with medical context instead of dumping raw data.

Safety Guard

Real-time · no LLM · Agent 1

Polls sensor readings every 10 seconds, checks safety thresholds, writes alerts to the DB, and pushes WebSocket notifications. No LLM.

db_poller · nurse_agent

ARIA Chat bot

Chat · RAG · Agent 2

Provides a RAG chatbot answering questions about the patient and their behavior, using health summaries for Agent 3.

health_agent · FAISS RAG

Clinical Report Agent

6h · persistent · Agent 3

Fetches 6-hour sensor windows, retrieves historical context from Agent 2, and generates structured health reports via LLM.
