SoterCare.

Helping elders receive the care they deserve

Continuous, non-intrusive care monitoring

THE STORY

Meet Passan and his parents

Passan has a job offer in Australia. His father, Mr. Fonseka, is 75 and lives with dementia, and his mother can no longer care for him alone.

HIS TWO OPTIONS

- **A carer at home**
- **A professional care home**

WHAT MATTERS TO PASSAN

Quality of care

A home built for his needs

Attentive carers

Someone notices when he needs help

Fast response

Help in minutes, not at the next round

Updates from anywhere

Honest updates from Australia

MACROTRENDS

Ageing faster than care can keep up

WORLDWIDE, BY 2040

1.3 billion

people aged 65+ by 2040

Heading into their 70s, when care needs rise fastest.
Over 1 billion by 2030, 1.6 billion by 2050.

CARE WORKER SHORTAGE, BY 2040

13.5 million

more care workers needed by 2040

Have ~22.5M

Need ~36M

Long-term care workers across OECD countries

Sources: US Census Bureau, An Aging World (1.3 billion aged 65+ by 2040); UN World Social Report 2023 (65+ tops 1 billion by 2030, 1.6 billion by 2050); OECD, Who Cares? 2020 (13.5 million more long-term care workers needed by 2040; 22.5M and 36M from its 60% rise on 2016).

THE PROBLEM

Care breaks down, unseen

SoterCare.

WHAT HAPPENS

Help comes late

31% of fallers waited over an hour on the floor

More hospital trips

1 in 4 falls led to an emergency visit

Reputations suffer

Families feel guilt and doubt the care

THE CORE PROBLEM

81%

of care home falls are unwitnessed

83% happen in the resident's own room, where no one is watching.

WHY IT HAPPENS

Understaffed

2 to 3 carers cover every room at night

Outdated monitoring

Unwatched CCTV, two-hourly rounds, call bells

Poor records

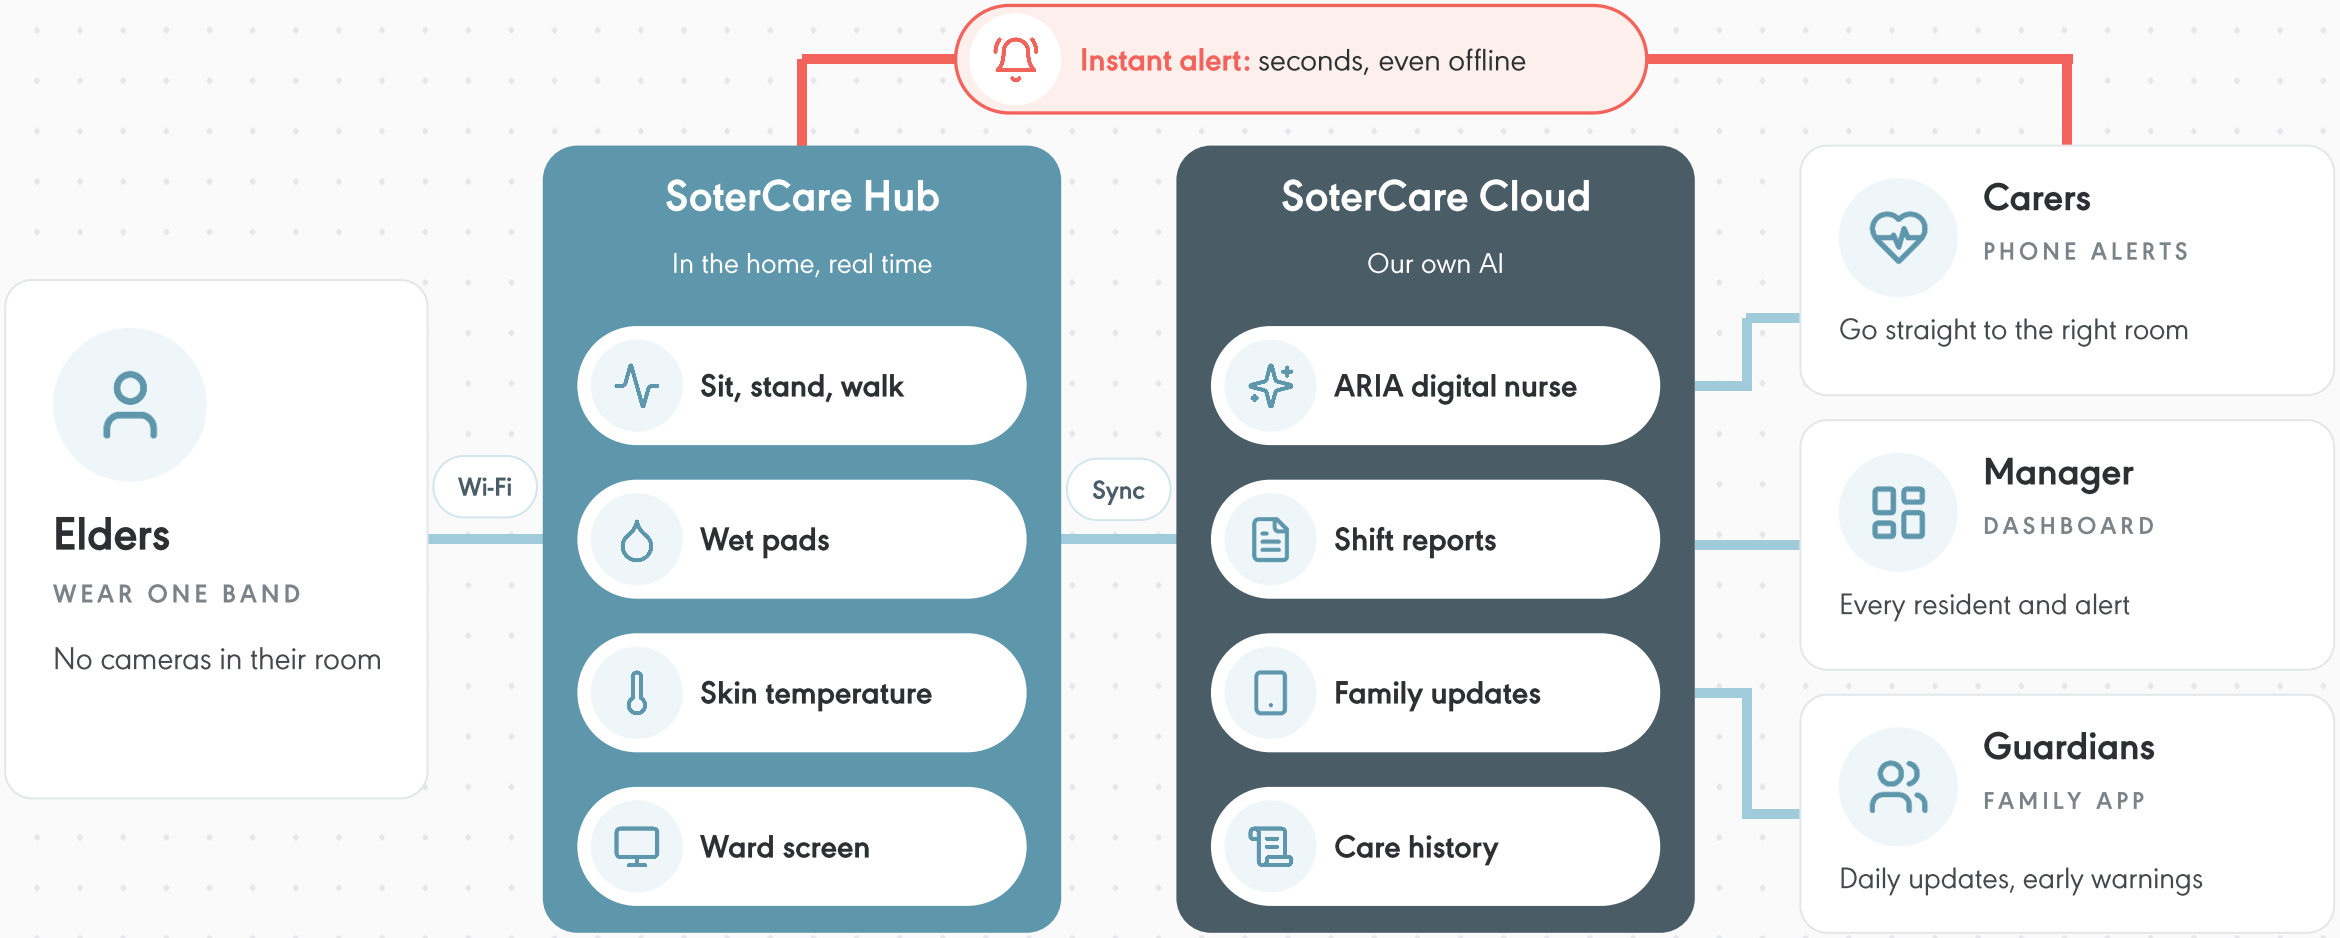

Handover runs on memory

Sources: unwitnessed falls and own room, JAMDA 2025 (212 falls, single US facility); time on floor, JMIR 2021 (6 memory care facilities); emergency visits, AJMC 2019 (SafelyYou pilot, control group); staffing, Kodagoda Gamage et al., BMC Geriatrics 2024.

THE SOLUTION

Connecting all, one ecosystem

SoterCare.

PRODUCT

The product, built to stay

Thigh band

Senses movement, moisture and skin temperature

Wi-Fi

SoterCare Hub

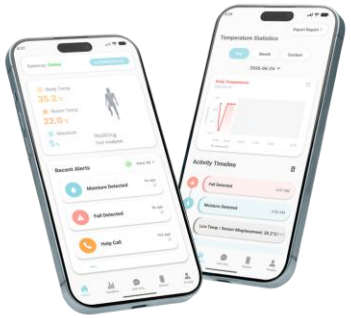

Knows if a resident is sitting, standing or walking; alerts carers over local Wi-Fi

Sync

SoterCare Cloud

Intelligence layer: learns each resident's patterns; keeps records and reports

Push

App

Carer app, family app and manager dashboard

97.65%

position accuracy (lab data)

WHY HOMES STAY: TO SWITCH, THEY WOULD HAVE TO

- Replace the hub
- Re-equip every resident
- Retrain all staff
- Move families to a new app

BENEFITS FOR CARE HOMES

What the care home gets back

UP TO

3x

cheaper than staffing one 24/7 post with 3 carers on 8-hour shifts

~$230	a month for SoterCare, hardware spread over 3 years
$390–690	a month for 3 carers at $130 to $230 each

In Australia and the US: 9x

Low, fixed price

About 4.5% of a home's income in year one

24/7, no cameras

Every bed watched day and night, with no cameras in rooms

Help before a fall

Carers are alerted the moment a resident stands up

One system for all

Alerts, records, shift reports and dashboards in one place

Proof of care

Every alert and response time logged for inspections

Families trust you

Daily updates turn guilt into confidence

25-bed home: $2,000 hardware over 36 months + $175 a month = ~$230. 24/7 cover = 3 carers on 8-hour shifts at about $130 to $230 a month each (Paylab Sri Lanka, carer, 80% range; fewer than 20 respondents): $390 to $690 a month, so 1.7x to 3x. US: one care worker earns $39,500 a year (BLS, May 2024) vs $4,100 for a first year of SoterCare.

WHY NOW

Three global shifts opened the window

SoterCare.

Privacy beats CCTV

UK regulators expect less intrusive options before cameras go into bedrooms.

No cameras in the room

Rules demand proof

Japan pays care homes that use monitoring sensors. Australia now enforces minimum care minutes.

Every alert and response is logged

Local Signals

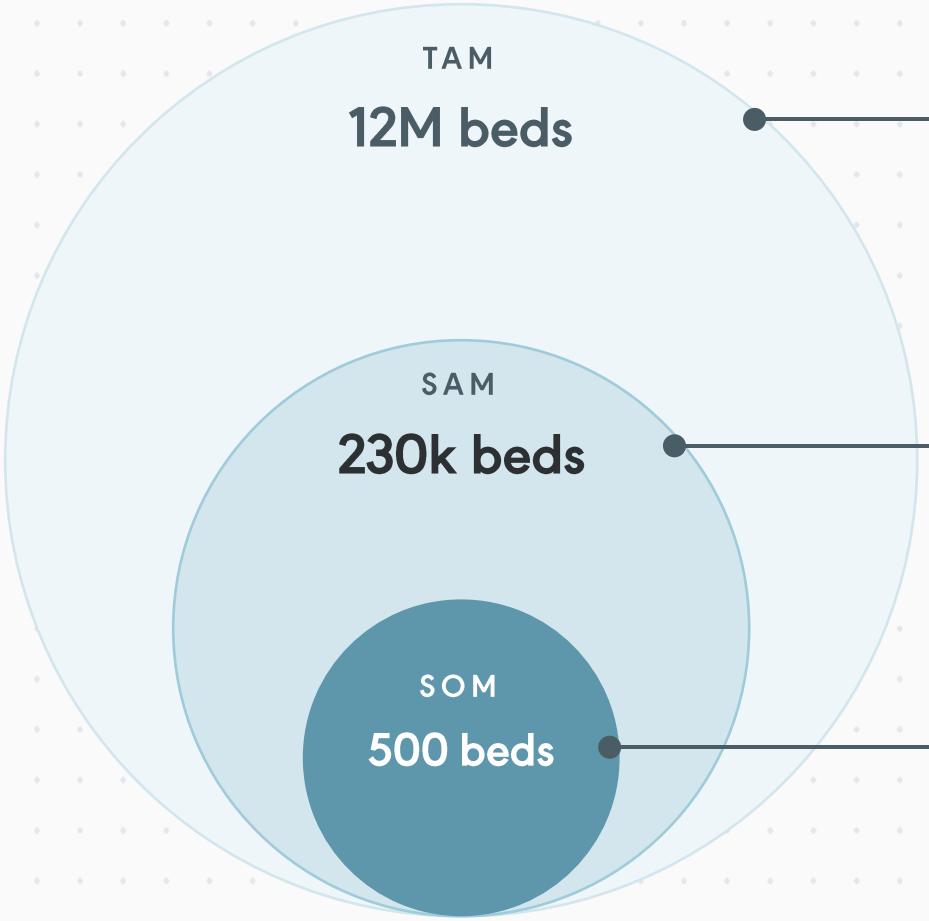

Home Lands is building Greendale, Sri Lanka's first international-standard retirement village

Future Market

Sources: CQC, Using surveillance in your care service; Japan MHLW 2024 care fee revision; Australia Aged Care Act 2024, in force 1 Nov 2025; APDM Opal list price (via Fibion); STMicroelectronics IMU distributor prices, 2026; Home Lands Skyline, Greendale (Daily Mirror).

MARKET POTENTIAL

Prove it in Sri Lanka, sell it to the world

TAM — **Global**

12 million care beds paying $400+ a month

$1.7B first-year value

SAM — **Sri Lanka + Australia**

2,250 fee-paying beds in Sri Lanka and 228,000 in Australia

$31M first-year value

SOM — **Sri Lanka, within 2 years**

500 beds in about 20 premium homes charging $1,000+ a month

$82k first-year value

First-year value = beds × $7 × 12 + $40 a bed + $1,000 a home (working in appendix A1). TAM: OECD Health at a Glance 2025 + China (team estimate) + Taiwan MOHW + Hong Kong SWD. Australia: GEN Aged Care Data, 30 June 2025. Sri Lanka beds and SOM: team estimates.

GO TO MARKET

Sell direct to premium care homes

SoterCare.

WHO WE SELL TO

- **Charge $300+ a month per resident**
- **25 or more beds**
- **Occupied 25+ days a month**

HOW WE REACH THEM

- **Direct sales to care home owners**
- **Healthcare fairs and geriatric conferences**
- **Referrals from geriatric doctors and hospitals**

WHAT WE SKIP

- Social media ads
- Sales trips to remote areas
- Homes that can't pay yet; later through CSR sponsors

PARTNERSHIPS
Retirement villages, starting with Home Lands' Greendale, Sri Lanka's first

44% of our raise goes to sales and marketing

Market signal: Home Lands Skyline, Greendale Retirement Resort and Residencies, Athurugiriya (Daily Mirror). Customer profile: team criteria.

BUSINESS MODEL

Healthy hardware margins, then a fee per bed

SoterCare.

THIGH BAND

$40

one per resident

Our cost	$19
Gross margin	52% ($21)

SOTERCARE HUB

$1,000

one per home, 15.6-inch screen

Our cost	$500
Gross margin	50% ($500)

SUBSCRIPTION

$7

per bed per month

Cost to serve	~$2
Gross margin	~70% ($5)

YEAR ONE, 25-BED HOME

$2,000
hardware, once

+

$2,100
subscription: 25 × $7 × 12

=

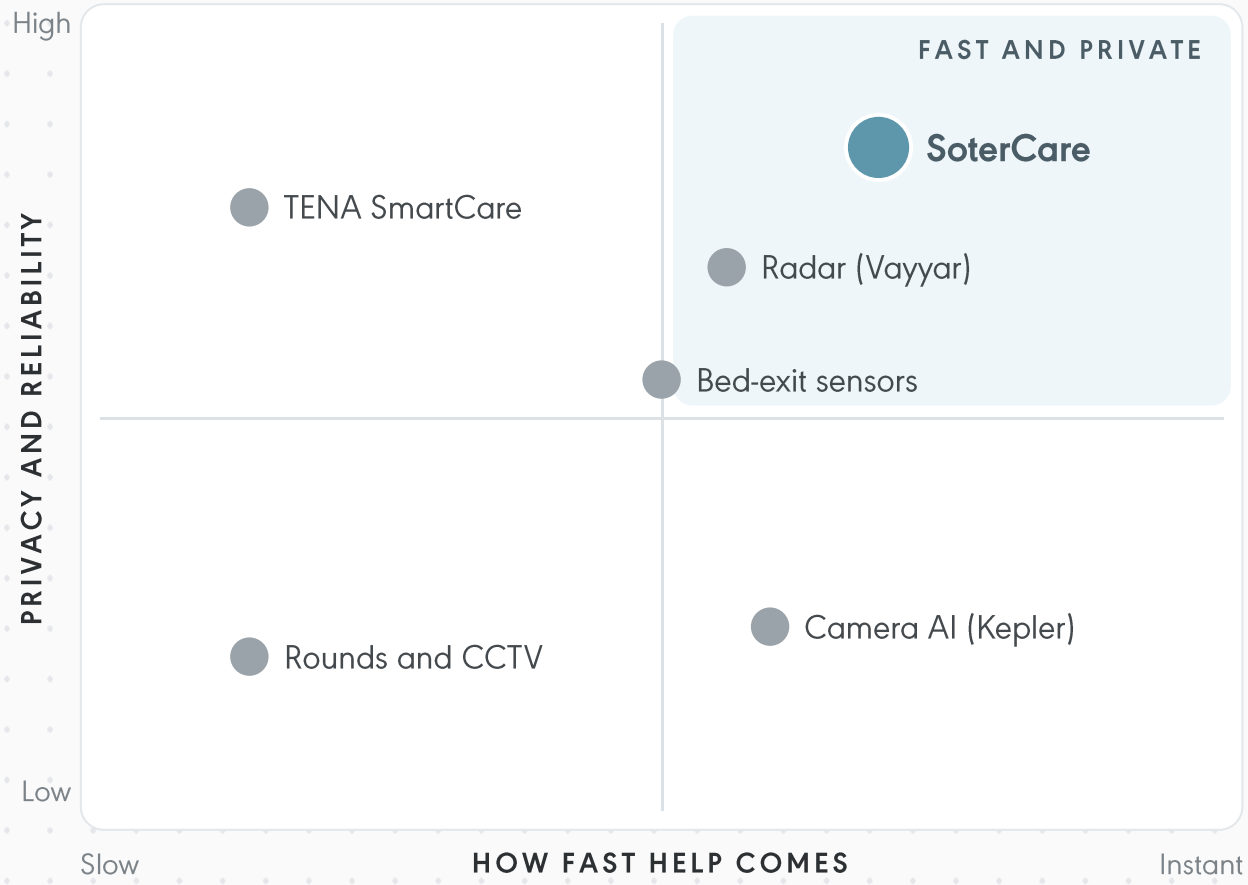

$4,100
total cost of ownership

≈

~5%
of $90,000 yearly income at $300 a bed

COMPETITION AND ALTERNATIVES

One full system, not just pieces

WE RUN THE WHOLE HOME

Others sell one piece: a camera, a mat or a pad. SoterCare brings alerts, records, reports and family updates into one system.

WHAT OTHERS DO THAT WE DON'T

Camera AI

Shows video of what happened. We give alerts and records, not footage.

Radar

Nothing to wear. Our band is worn and charged about once a week.

Bed-exit sensors

No charging and cheaper per bed, but they only see the bed.

Sources: Abilia Alert-iT; eastin.eu (bed-exit alarm RRP); DAZA OptiSCAN; TENA SmartCare (tena.co.uk); Kepler Vision / MOBOTIX NurseAssist; Vayyar Care reviews, 2026.

TRACTION

TRL 6 today, TRL 7 next with NIA

APPENDIX · A1

Market sizing: the working

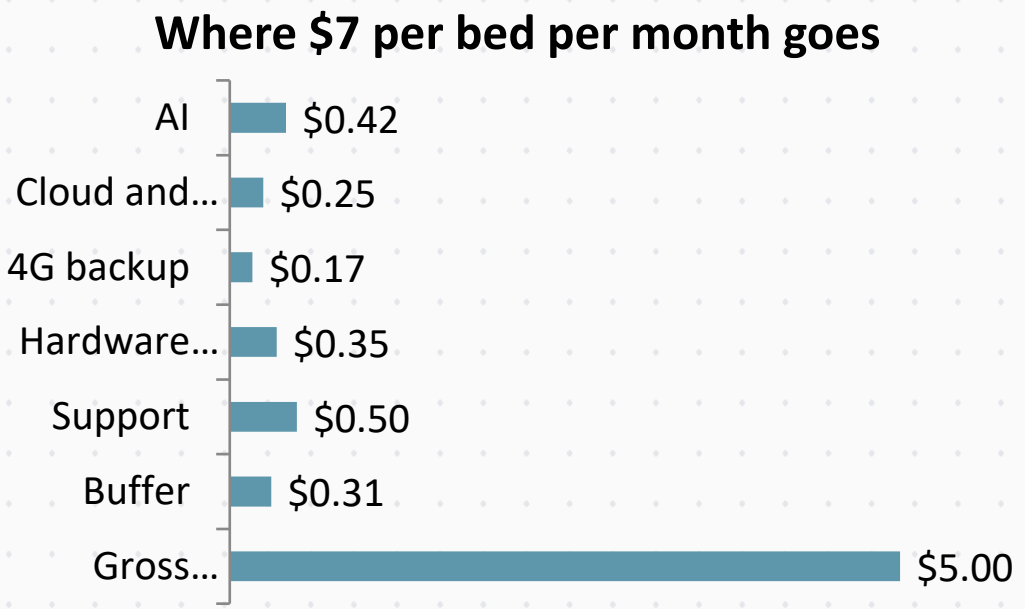

Market and segment	Beds	Subscription / year	Hardware, once	First-year value
SOM: ~20 Sri Lankan homes (~25 beds each), 18 to 24 months	**~500**	**$42k**	**$40k**	**~$82k**
SAM: Sri Lanka + Australia	**~230,000**	**$19.4M**	**$11.9M**	**~$31.3M**
of which Sri Lanka, fee-paying homes (~90 × 25 beds)	~2,250	$189k	$180k	~$369k
of which Australia, residential aged care (GEN, June 2025)	~228,000	$19.2M	$11.7M	~$31M
TAM: global care beds paying ~$400+ a month	**~12M**	**$1.0B**	**$670M**	**~$1.7B**
of which OECD countries (OECD Health at a Glance 2025)	~10.3M	$865M	$578M	~$1.4B
of which China, beds paying 2,900+ yuan a month (estimate)	~1.3M	$109M	$73M	~$182M
of which Taiwan (~110,000) and Hong Kong (~76,000)	~0.19M	$16M	$10M	~$26M

First-year value = beds × $7 × 12 + $40 a bed + $1,000 a home. TAM = OECD (252M people aged 65+ × ~41 long-term care beds per 1,000) + China care beds paying 2,900+ yuan ($400+) a month (team estimate: ~25% of 5.2M institutional beds) + Taiwan (MOHW) + Hong Kong (SWD). In Sri Lanka, premium homes clear $400 (Royal Nursing Home's Mount Lavinia rooms start at about $560), while a typical fee-paying home charges about $300. Hardware = $40 per bed + one $1,000 SoterCare Hub per home, assuming ~62 beds per home in TAM markets, ~88 in Australia (228,259 places in 2,590 homes) and ~25 in Sri Lanka. SOM is about 22% of Sri Lanka's ~2,250 fee-paying beds. Priced at our $7 launch fee, so conservative. Totals rounded.

APPENDIX · A2

Hardware pricing, margins and cost to serve

Item	Our cost	Price	Margin
Thigh band	$19	$40	52%
SoterCare Hub, 15.6-inch touch	$500	$1,000	50%
25-bed home kit	$975	$2,000	51%
Per bed, 25-bed home	**$39**	**$80**	**51%**
Per bed, 60-bed home	**$27**	**$57**	**52%**

SoterCare Hub cost: Compute Module 5 $100, 15.6-inch touch panel $125, carrier board with 8 USB-C charging ports $45, LTE $22, battery backup $28, enclosure and stand $48, power supply $15, speaker and cables $17, assembly and test $25 = $425, +3% yield and +15% freight and duty = ~$500. Node landed at 1,000 units. Excludes one-time tooling ($5k to $12k). Estimates, to be replaced with supplier quotes.

APPENDIX · A3

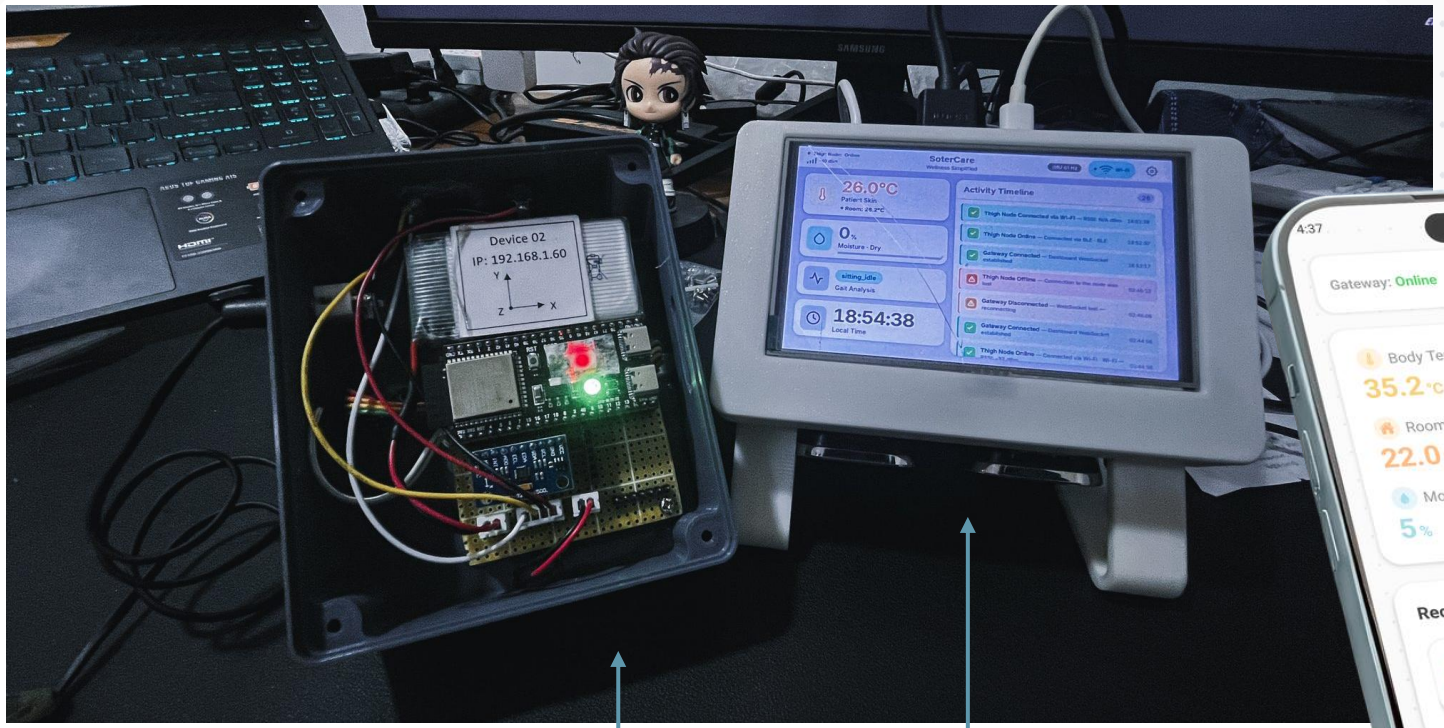

SoterCare.

Known risks, and how we handle them

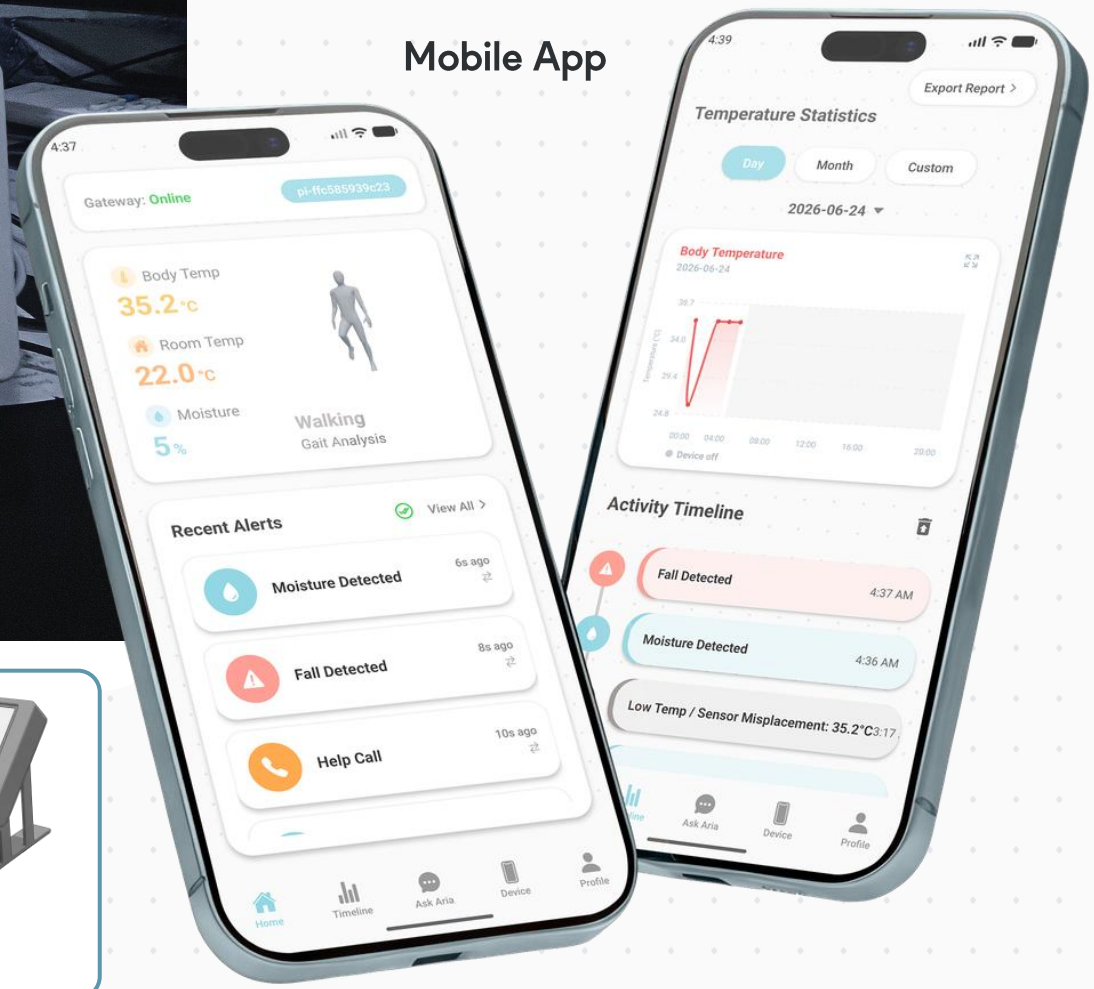

Risk	Mitigation
Residents remove or refuse the wearable, especially with dementia	Soft thigh strap under clothing; measure wear time per resident; target 80%
Charging becomes a burden on scarce staff	7-day battery target; 8 USB-C charging ports on the SoterCare Hub; low-battery alerts
False stand-up alerts cause alarm fatigue	Report false alarms per bed a week, not lab accuracy; carer confirm or dismiss retrains the model
Lab gait accuracy does not transfer to real homes	Testing phase logs every stand-up attempt against every alert
Home Wi-Fi is unreliable	SoterCare Hub alerts carers' phones over local Wi-Fi, no internet needed; it buffers data; site survey before install
Medical device rules (NMRA in Sri Lanka, TGA in Australia)	Position as safety monitoring and records, not diagnosis; comparable fall alarms are TGA Class 1; engage regulators early
Homes with low budgets can't pay upfront	Start with fee-paying homes; hardware-as-a-service option; CSR sponsors for charity homes

APPENDIX · A6

Why Australia is our next market

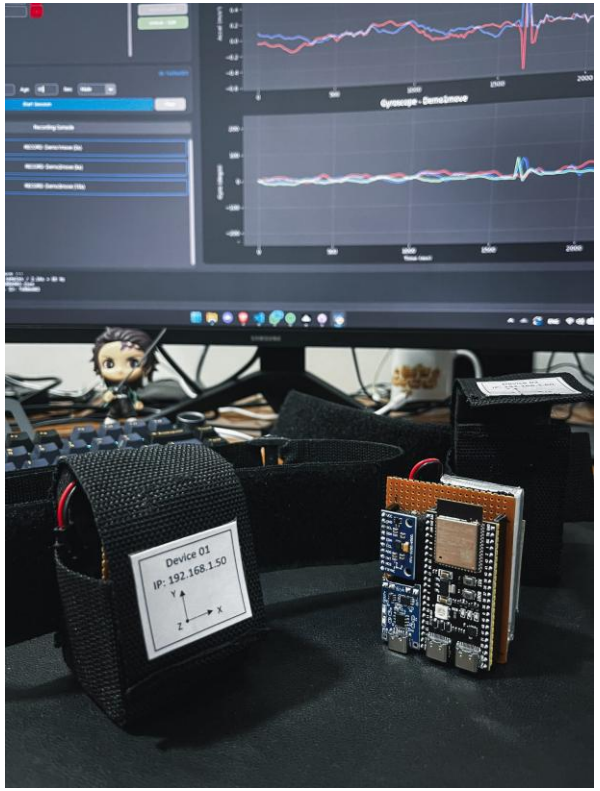

Factor	Australia: next	United States: later
Beds	~228,000 residential beds in 2,590 homes (June 2025)	~2.9M beds in 46,900 homes (2022)
Buyers	707 providers; the top 25 hold ~45% of beds, so a few deals reach scale	46,900 homes across 50 states: many more deals for the same share
Demand	By law: 215 care minutes per resident a day and a registered nurse on site 24/7, while staff are short	Staff shortages; one fall hospital stay costs ~$30,000
Device rules	TGA: comparable bed and chair fall alarms are Class 1 medical devices, listed through a local sponsor	FDA: comparable wearable fall alarms are Class I, exempt from 510(k)
Other rules	RCM mark for radio and electrical safety; Privacy Act 1988 for health data	FCC for radio; HIPAA for health data; state rules
Competition	Fall mats and nurse-call add-ons are common (e.g. Indigo Care)	Well-funded AI players already selling (e.g. SafelyYou)
Value at $7 a bed	$19M a year + $12M hardware	$244M a year + $163M hardware
Verdict	**First export market**	**Next, once certified and proven in Australia**

Sources: GEN Aged Care Data, stocktake 30 June 2025; KPMG Aged Care Market Analysis 2025 (top 25 providers); Aged Care Quality and Safety Commission and ANMF (care minutes, 24/7 registered nurse); TGA ARTG 288028 (bed/chair fall alarm, Class 1); FDA 21 CFR 880.2400, product codes PJO and PJP; CDC NCHS 2022; CDC (fall hospital stay cost). Values at our $7 launch fee, $40 a bed and $1,000 a home.
